

DS178-T

2 WAY CEILING SPEAKER

**Technical data:**

- 45W @ 8 Ω
- Frequency 70Hz – 20 KHz
- Sensibility 88dB(1W/1m)
- Impedance 8 Ω
- Transformer 32/16/8/4W
- Woofer 6,5"
- Tweeter 1"
- Mounting bracket included
- Dimensions $\Phi 203 \times 109$ mm
- Mount hole $\Phi 200$ mm
- Magnetic finishing grid
- Color black with white grid

DS178-T is a ceiling speaker with a 100 Volt transformer. You can select different power levels or 8 Ω connection through the proper switch.

Suitable for voice and music, designed specifically for false ceilings, it is invisible but always provides a linear response.

It finds good use in installations in small-medium conference rooms, small-medium multimedia rooms, cruise ships, classrooms, swimming pools, industrial areas and amusement parks.
