## FS 470 FOULARD MICROPHONE

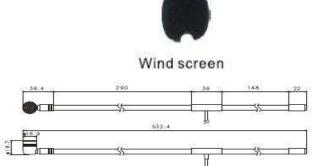

Professional dynamic microphone for external use

## **Capsule specifications**

- Dynamic
- Unidirectional
- Frequency 100Hz-18.000Hz
- Sensitivity -84dB±3dB
- Impedance  $600\Omega \pm 30\%$  (@ 1KHz)

## **Accessories**

The **FS 470** foulard microphone is a multifunctional, dynamic and modern design product. Its smooth, ergonomic and flexible collar has been designed to adapt to necks of any size, it is easily wrapped around the neck and can be worn indifferently with the microphone on the right or left side. Its excellent acoustic characteristics and compact design are ideal for the use of outdoor sound systems, processions, events, animation, etc., for all those who need high sound and voice quality and have their hands free.

A cardioid microphone, whose unidirectional range produces better sound isolation and effective feedback control. By minimizing ambient noise and those deriving from handling a microphone, all background noise is eliminated.

The best performance is obtained by placing the microphone capsule a few centimeters away in front of the mouth. The integrated small cable has been positioned in the back of the collar for maximum comfort during use.
