Polar Pattern:

**FS 901** is ideal for the creation of a fixed system for churches, conference rooms, boardrooms, courtrooms. Its discrete and compact dimensions make it suitable for use on pulpits and lecterns in churches.

Modern, innovative design, reasonable cost with excellent performance, this and more is what the **FS 901** flat microphone offers.

This microphone has a balanced low impedance output, which allows you to use a long cable without loss of frequency or unpleasant hum. A cardioid microphone, whose unidirectional range produces better sound isolation and effective feedback control. By minimizing ambient noise and those deriving from handling a microphone, all background noise is eliminated.
